

Warehousing Equipment Direct

Warehousing Equipment Direct

pair of 6"x60" fork extension for 5" wide forks

Price: \$220.00

FORK EXTENSIONS

The forklift fork extension allows handling of large and odd shaped loads with better stability and reduced product damage.

Simply slide forklift fork extension over fork, and fork extension will lie on top of your fork and lock under fork hanger.

Each forklift fork extension is constructed from structural channel, and features plasma cut taper on the front tip.

Welded loop on end of extension keeps it in place and makes it convenient to take on and off.

OSHA requires that forklift fork extensions cannot exceed 1.5 times the length of the fork. Fork extensions are designed for hook type forks only.

For shaft mount fork extensions, please call for information.
