Aluminum Dock Plate - 12AP4830

Price: \$364.00

ALUMINUM DOCK

PLATES

Aluminum dock plates are an economical solution to unloading trucks and semi-trailers with hand trucks, manual pallet trucks and electric Pallet trucks. These light capacity dock plates are constructed from High-Strength Aluminum Tread plate. All aluminum dock plates have beveled edges for a smooth entry and exit. Each plate comes standard with bolted on steel legs that secure aluminum dock plate in place between trailer and dock. Two built in hand holes provide easy moving of these dock plates.

Standard lip is 11" with an 11 degree bend. An optional 14" lip is available for refrigerated truck applications. Other lip sizes and bends Available upon request. Aluminum dock plates range in sizes from 36" wide to 72" wide, and lengths up to 72" long. Please refer to table for weight and capacity of these dock plates.
